

Adel Haridy

Network & Systems Engineer

Egypt | your@email.com | GitHub: github.com/cybe55 | Portfolio: cybe55.github.io

Professional Summary

Network & Systems Engineer with strong hands-on experience in enterprise networking labs and system administration. Certified in CCNP ENCOR, CCNA, RHCSA, and MCSA, with solid practical knowledge in routing, switching, redundancy, and infrastructure services. Actively seeking training or junior network/system engineer opportunities.

Certifications

- Cisco CCNP ENCOR – Enterprise Core Networking
- Cisco CCNA – Routing & Switching
- Microsoft MCSA – Windows Server Administration
- Red Hat RHCSA – Linux System Administration

Technical Skills

Networking: OSPF, EIGRP, BGP, VLANs, Trunking, STP, EtherChannel, HSRP, VRRP, GLBP, ACLs, NAT (Static, Dynamic, PAT), Network Troubleshooting

Systems: Windows Server (Active Directory, DNS, DHCP, Group Policy), Linux (User & Permission Management, Services, Bash, Monitoring)

Hands-on Labs & Projects

- Designed and implemented LAN and subnetting scenarios with full connectivity verification
- Configured multi-router OSPF with MD5 authentication
- Implemented gateway redundancy using HSRP, VRRP, and GLBP
- Applied Standard & Extended ACLs for traffic control
- Configured NAT (Static, Dynamic, PAT) for internet access
- Built DHCP and DHCP Relay Agent scenarios across multiple subnets
- Implemented EtherChannel using PAgP and LACP
- Overall lab performance: 97.22% – Excellent

Tools & Environments

Cisco Packet Tracer, GNS3, VMware, Windows Server, Red Hat Linux

Career Objective

To gain hands-on industry experience through training or a junior role in network and system administration, and contribute to building stable, secure, and scalable IT infrastructures.
